

Database Migration Report

Objective

To migrate data from MySQL to PostgreSQL while ensuring data integrity.

Method Used

The migration process was demonstrated using SQL scripts. Schema and data were recreated in PostgreSQL-compatible format.

Steps Performed

1. Created tables in PostgreSQL 2. Converted AUTO_INCREMENT to SERIAL 3. Inserted data 4. Maintained foreign key relationships

Data Integrity Verification

Row counts were verified and relationships preserved between tables.

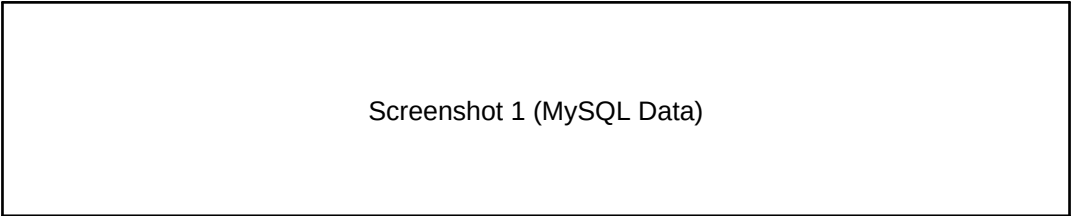

Challenges Faced

Syntax differences between MySQL and PostgreSQL, handling AUTO_INCREMENT vs SERIAL.

Conclusion

Migration process was successfully demonstrated with maintained data integrity.
